RECENT PROJECTS

WEATHER APP | Solo Project   GitHub | Live Site
March 2023

Developed using: React, Redux, Node.js, PostgreSQL, Express, Sequelize.

Description: When the user searches for a city they can see the detailed current weather and the forecast for the next 7 days. They can save their favorite cities by creating an account.

ANYONE CAN COOK | Group Project   GitHub | Live Site
December 2022

Developed using: JavaScript, HTML, CSS, and API's.

Description: The user is presented a dish and cooking instructions based on the type of food they searched. They can find a drink pairing by using the random drink generator.

My Role: I used JavaScript to make API calls and manipulate the DOM to display recipes. I organized a clean coding style for the project and helped my classmates understand JavaScript logic.
